Experience

Webfictive Solution   Chandigarh, Pb

Front-End Developer   *Oct 2023 - Present*

- **Responsive Web Development:** Created and maintained responsive web applications using HTML5, CSS3, and JavaScript, enhancing user accessibility across devices.
- **UI/UX Collaboration:** Partnered with designers to implement engaging user interfaces, improving customer satisfaction scores by 20%.
- **API Integration:** Integrated third-party RESTful APIs to enhance functionality and data retrieval, resulting in smoother user experiences.
- **Component Development:** Built reusable React components that improved development speed by 50%, allowing for faster feature rollouts.
- **Performance Optimization:** Improved application load times by 30% through code optimization techniques and best practices.

Education

SRM Institute of Science & Technology   Chennai, TN

Bachelor of Technology in Computer Science and Engineering; GPA: 3.44 (8.55/10.00)   *Sept 2020 – May 2024*

Projects

- **Spotify Clone**
  - Integrated a music player with controls for play, pause and volume adjust, allows users to stream songs seamlessly.
  - Enabled users to create, edit, and manage playlists with the ability to add or remove songs.
  - Built using HTML5, CSS3, JavaScript, and React for the front-end, with integration of third-party APIs for music streaming.

- **Portfolio website**
  - Developed a personal portfolio website to showcase my projects and skills.
  - Utilized HTML and CSS for structure and styling, and JavaScript and React for dynamic content and interactivity.
  - It serves a dynamic platform for potential clients and employers to view my work and connect with me.

- **Games Websites**
  - Developed 2 interactive games, Tic Tac Toe and Whack a Mole, using HTML, CSS, and JavaScript
  - Currently expanding the collection with additional similar projects to further enhance programming and design skills.
  - Applied game logic and responsive designs to ensure an engaging user experience
